About me

I'm a Front-end developer (React/JavaScript) who has a results-focused attitude to creating SPA, using React (JS/TS), Redux.

Have basic knowledges and little experience with Angular.

In the near future I plan to improve in React and related technologies, as well as deep learning Angular. Working hard to improve my English.

In the future I see myself as a Full Stack Developer.

My free time is dedicated to Codewars and programming tutorials. I am passionate about creating excellent software that improves the lives of the people around me.

Ready to consider project work and full-time employment.
